

If the QuickBooks undeposited funds default preference (using as a default deposit to account) has not been modified, we recommend turning that off, as it only causes issues in the long run. Doesn't mean undeposited funds can't be used, but don't make it a default.

To change that preference...

From the QuickBooks Toolbar select **Edit > Preferences** (from the pull-down pick-list)

From Preference list select **Payments > Company Preferences** Tab, Uncheck "Use Undeposited Funds as a default deposit to account" > Click **OK**

Accept the Warning message > Click OK

QuickBooks will close all open windows and your preference will be set.
